DIY Waterproof Stickers

Stickers are one of my very favorite things to make with my Cricut. They are also one of my favorite things to teach how to make because I can use it to cover so many Design Space tools and tricks for making stickers including:

- Offset
- Flatten
- Contour
- Slice
- Weld
- Using Digital Patterns
- How To Get The Most Out Of Your Print Then Cut Page
- The Best Places To Find Images For Your Stickers

Waterproof stickers have made a real comeback with many sticker makers selling their stickers for $4-7 each! You can use them to decorate your laptop, water bottle, travel mug, journal and so much more.

I'm going to be teaching you two ways to make waterproof stickers– my easy, goof proof version uses a laminator and laminating pouches. The second way uses vinyl overlay.

Supplies:

(Use code HELLOCF at Cricut.com for 10% off materials and accessories with $100 order + free shipping in US and CA.)

- Cricut Maker or Cricut Explore cutting machine
- Light Grip Cutting Mat
- Cricut Fine Point Blade
- Color Printer
- **One or more of the following:**
    - Printable Vinyl (this link is to my favorite kind out of 8 printable vinyl/sticker papers that I tried)
    - Holographic Printable Vinyl

Easy, Goof Proof Version:

- Laminating Machine
- Laminating Pouches
- Cardstock
- Scissors

Second Version:

- True Control Knife or Craft Knife
- Self Healing Mat
- Ruler
- **One or more of the following:**
    - Transparent Holographic Overlay
    - Transparent Vinyl Overlay-
    - Avery Self Adhesive Laminating Sheets

Optional:

- Slice Tool

I can't wait to craft with you! -Crystal
